- STEP 2. Snap plastic retainer clips onto third wire from top of driver side and passenger side taillight guards (See Figure 1).
- STEP 3. Lift rear hatch to access taillight mounting screws located in the hatch jamb. Remove (but do not discard) the two factory screws (one upper and one lower) that attach the taillight.
- STEP 4. Center taillight guard over taillight and adjust bracket so that retainer clip rests snugly against lens. Loosely secure taillight guard to vehicle, re-using factory screws previously removed in step 2. Carefully close hatch and make sure taillight guard does not interfere with operation of hatch opening and closing. Adjust brackets as necessary. Tighten screws snugly using caution to avoid cracking taillight housing assembly.

FINISH PROTECTION

Westin products have a high quality finish that must be cared for like any other exposed finish on the vehicle. Protect the finish with a non-abrasive automotive wax, (e.g. Pure Carnauba) on a regular basis. The use of any soap, polish or wax that contains an abrasive is detrimental, as the compounds scratch the finish and open it to corrosion.

DISCLAIMER FOR WESTIN PRODUCTS

Buyer assumes all risk and liability whatsoever from the installation and use of Westin products. Westin products are sold as decorative accessories and should not be relied upon as protection for the vehicle or occupants in the event of a collision or roll over. Vehicles equipped with a supplemental restraints system (air bags) deployed by impact should not be modified by any aftermarket Grille Guard, Push Bar, Light Bar or Bull Bar without first consulting the vehicle manufacturer. Westin Automotive Products, Inc. assumes no liability for injury, loss, incidental or consequential damages in the event of a collision or roll over.
